## **DETAILED ACTION**

## **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Applicant's Representative Mr. Marc Rossi Re. NO: 31923 on November 15, 2004. In Page 9,claim 1, line 15 add after the word "motor" wherein the permanent magnet shapes in a flat-plate.

In page 10, claim 5,line 23 adds after the word "motor" wherein the permanent magnet shapes in a flat-plate.

Cancel claim 2.

## Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance:

Regarding claim 1,the prior art of the record does not teach or suggest a supporting structure for a linear motor comprising: an outer yoke forming a fixed section of the linear motor and including inter alia, an inner yoke facing the outer yoke at a given gap in between and including a laminated core formed by laminating thin magnetic plates a permanent magnet rigidly stuck to the laminated core of the inner yoke, and an output shaft, wherein the Inner yoke is rigidly mounted to the output shaft and forms a movable section of the linear motor, wherein the permanent magnet shapes in a flat-plate.

Application/Control Number: 10/628,582

Art Unit: 2834

philadion/Condor Hambon 10/020,0

Regarding claim 5,the prior art of the record does not teach or suggest a supporting structure for a linear motor comprising: an outer yoke forming a fixed section of the linear motor and including inter alia, a permanent magnet rigidly stuck to the laminated core of the inner yoke, and an output shaft, wherein the inner yoke is rigidly mounted to the output shaft and forms a movable section of the linear motor, a compressor mechanism including a cylinder and a piston, wherein the cylinder is mounted to the fixed section of the linear motor and forms a fixed section of the linear-motor based compressor, and the piston is linked to the output shaft of the linear motor and forms of a movable section of the linear-motor based compressor; a resonant spring disposed between the fixed section and the movable section of the linear-motor based compressor, wherein the linear motor based is driven by a frequency around a resonance frequency that is determined by masses of the fixed section and the movable section of the linear-motor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Iraj A Mohandesi whose telephone number is 571-272-2028. The examiner can normally be reached on M-F.
